### "Your Hardware Merchants"

HON. WM. EARL ROWE

With a provincial election coming up, the Hon. Earl Rowe, has received the endorsement of the Ontario Federal Conservatives, and will lead the Ontario Conservatives to the polls.

### GAME REGULATIONS

The Department of Mines and Resources announced migratory bird regulations for the 1937 hunting season, extending the restrictive principles of the 1936 regulations imposed to meet serious depletion of waterfowl through over-shooting and through drought on prairie nesting grounds.

The regulations which include bag limits for ducks and geese and open season dates in the various provinces in 1937, duplicate "very strict regulations" in effect in the United States in 1935 and 1936 under the Migratory Birds Treaty.

In all provinces, bag limits for ducks is placed at 12 a day. Bag limit for the season is 120 in the Maritime provinces, Ontario and Quebec, and 100 in the prairie provinces and 120 in British Columbia.

### Gasoline Tax Now 27.83 On The Dollar Purchase

In every province of the Dominion the tax content of every dollar's worth of gasoline bought exceeds 25 cents in three of them it is over 30 cents.

By a recent computation it has been shown that in this singular tax parade Alberta surprisingly has the lowest levy. When a purchaser spends \$1.00 for gasoline in Alberta, he may count that 25.84 cents goes toward taxes.

In other provinces the corresponding figures are: Saskatchewan, 27.17 cents; Manitoba, 26.90 cents; British Columbia, 28.20 cents; Quebec, 27.44 cents; Ontario, 29.90 cents; New Brunswick, 31.08 cents; Nova Scotia, 32.08 cents; Prince Edward Island, 33.37 cents.

### LOCALS

Miss Hazel Taylor of Blackie is visiting at the home of her parents, Mr. and Mrs. C. Taylor.

Reno Remaldi, who is visiting relatives in Blairmore, was a week end visitor at Waterton National Park.

Mrs. G. M. Campbell and Miss Rheta Campbell, who have been holidaying in the east, returned to Champion over the week end.

Alex Remaldi has been busily engaged during the past few weeks repairing rural schools for the fall session.

Mrs. R. Tyler received word that Ronald Birkenhead passed in all his subjects in Grade XI with honors.

Mrs. Frank Little had as her guests, her father, mother and sister of Manitoba for a few days this week.

Marie Hall returned to her home Monday, after spending a month at the home of Mr. and Mrs. A. Ferguson.

J. Voisey of Vancouver is spending a holiday at the home of his son G. Voisey and Mrs. Voisey.

Mr. and Mrs. W. G. Laidlaw of Cardston are receiving congratulations on the birth of a baby boy, in the Cardston hospital on Wednesday, August 11th.

Miss Florence Woodhall has accepted a position on the staff of the Northwestern Presbyterian Hospital in Albuquerque, New Mexico and is now located at that point. Prior to her move Miss Woodhall was located at Oak Terrace, Minn.

A few combines were at work but rain halted operations on Thursday. Combining should be fairly general next week. Fields threshed are yielding from eight to twenty bushels and better returns will be realized from later crops.

Farmers on a whole seem thoroughly satisfied with returns, the yield, in many instances being better than expected. Samples on display in McIntyre & Co. hardware show plump kernels of wheat that are weighing from 60 to 64 pounds to the bushel and yielding up to 20 bushels. That there will be more wheat in this district than expected is undoubtedly certain.

### Visitor Reviews Methods Here

I. H. Jensen, a newspaper man from Boone, Iowa, who has been visiting in the Chapin district, posted the weekly newspapers of Alberta, but says they should be given much better support. Following is an extract of a statement made by Mr. Jensen and published in the High River Times:

"I have seen several of your newspapers in Alberta and they are of a very high standard. I certainly compliment your weekly here, but you are laboring under very hard conditions. It would seem that up here the weekly press is still on a sort of charity basis, without the business men in town realizing how important a medium the newspaper is, the most important element of any community. "In our state the press is on a substantial assured footing, and its importance is fully recognized. It has sources of revenue apparently denied to the newspapers of Alberta. For one thing the town council minutes complete, are paid for. That is compulsory. It is the business of the taxpayer to know what his money is going for, and the service of publication has a definite monetary value. Municipal council meetings would go under the same head. Then we have a county administration for roads, parks, etc. A report of each meeting of this board is required to be issued in the papers having largest circulation, and this copy is paid for at a good rate. Nothing legal can be done without publication in the newspapers. The banks must issue periodic statements. And added to this is the great general advertising of merchandise.

"The reason for improvement that I can see in the Alberta press, is a recognition by the public of its vital importance to the community, and the necessity for its maintenance. This is realized by our governing bodies, who go on the principle that the business of the people should be made available to the people through the press, and that this service is legitimate expenditure. With us, the press is a great controlling body, disciplined within its own organization—serving as best it can to promote any good cause and maintain honest standards. But reports of business proceedings are reckoned as having a cash value, to the community. I confess I do not see how you continue to publish such a high standard of newspaper with such meagre support."

### PLENTY OF FINE HORSES COULD BE LOCATED

According to district farmers there is no shortage of horses suitable for road construction. In a recent announcement from the Capital, horses were scarce. All the government need is to spend a few dollars with the newspapers of the province and see for themselves that there is no shortage of suitable horses in Alberta.

If your harvest equipment is incomplete, use a classified ad for quick returns

### LOCALS

Mrs. J. N. Beaubier has been on the sick list this week.

R. I. Baker was a business visitor in town last week.

Geo. Rhodes purchased a new Oliver tractor this week.

Mrs. Jim Matlock was a visitor in town this week.

O. Castator is driving a new rubber tired Twin City tractor, purchased last week.

Howard St. Peter who has spent the past week in Champion returned to Milo Sunday.

Mrs. Beverly Roberts of Barons was a Champion visitor Sunday.

Miss Lona Stephenson is spending a few days visiting in Calgary.

Mr. and Mrs. Harvey Vann of Medicine Hat were visitors at the home of Mr. and Mrs. Harry McNaughton this week.

Miss Agnes Irwin of Vulcan visited at the home of Mr. and Mrs. Harvey Jopling over the week end.

Mrs. A. McDougall is making favorable progress following a major operation at the Vulcan hospital Saturday. Miss Smith of Calgary is the nurse in charge.

The Sunday evening services at the United Church on August 22nd and 29th, will be conducted by Mrs. Oldfield, who as Miss Gilheoley, was for many years secretary of the Girls' Work Board. All G. I. T. girls and others are urged to attend these services.

### CARMANGAY NEWS

On Sunday Mr. and Mrs. Jim Davey and son George drove to Gleichen where they were the guests of Mr. and Mrs. Donald Bond.

Miss Francis Dayman is holidaying at the home of Mr. and Mrs. Con. Miller at Pincher Creek.

## CHAMPION THEATRE

Saturday, August 21st. 1937

### "One Way Passage"

WITH

William Powell & Kay Francis

In the picture that won them their greatest fame.

EXTRA ADDED ATTRACTION

The Louis-Braddock-Fight Pictures

One Showing at 8:30

### FIRST CAR OF NEW WHEAT—EXCELLENT

Pete Holm shipped the first car of new wheat from this district on Wednesday, August 18th. The Searle Grain Co. handled the wheat. Fred Clever being the agent in charge. The grain weighed 62 pounds to the bushel, graded No. 1 northern and yielded 10 bushel to the acre.

Louis-Braddock fight pictures with added feature, Friday, August 20th. Weekly shows from now on.

Mr. and Mrs. Tom Treadaway and two daughters of Crossfield were in the district Friday looking up old friends. Tom was a former resident of Carmangay.

After the reading of the minutes at the hospital meeting, the cushion which Mrs. E. Lazo had given and also sold tickets to the amount of \$21.55, was drawn for by little Clara Greene, the winning number going to Mrs. George Greene. The proceeds are in aid of the hospital.

### Flower Show Draws Record Attendance

Over one hundred entries won the admiration of a large crowd of spectators at the annual flower show sponsored by the Champion W. L. on Saturday afternoon in the United church. As one entered the church which had been been fully decorated for the occasion in the festive colors, a maze of color and a unity from two long tables greeted the visitor, where practically every variety of flower and plant grown in this district, was on display. As one gazed upon the beautiful flowers it was hard to believe that wind and drought were ever known here.

Ten tables placed in between the tables of flowers made a pretty setting for tea tables, capably served by a few of the local girls.

The committee in charge, namely, Mrs. Stephenson, Mrs. M. Carlson, Mrs. J. M. Pharis and A. Miller are to be congratulated on a very successful flower show.

Following is a list of the prize winners:

- Sweet peas—(1) Mrs. M. Spaulke (2) Mrs. G. Voisey.
- Pansy—(1) Mrs. E. Carlson (2) Mrs. A. Miller.
- Petunia—(1) Mrs. E. Carlson.
- Phlox—(1) Mrs. J. Cain.
- Margold—(1) Mrs. G. Voisey.
- Uphill—(1) Mrs. W. Ulf.
- California poppy—Mrs. J. Pharis.
- Superglory—Mrs. M. Carlson.
- Camom—H. Gill.
- Gladstone—Mrs. M. Spaulke.
- Snufflower—Mrs. J. N. Beaubier.
- Goldsong—U. S. Alexander.
- Asplenium—Mrs. E. Carlson.
- Dolphinsium—Mrs. E. Carlson.
- Goddard—U. S. Alexander.
- Daisy—Tenny Gilroy.
- Assorted flowers—(1) Mrs. E. Carlson (2) H. Maxwell.
- Fern—Mrs. R. I. Baker.
- Foliage—(1) Mrs. Beaubier (2) H. Maxwell.
- Flowering maple—Mrs. G. Stewart.
- Table centre—(1) Mrs. Pharis (2) Mrs. Ulrich.
- Collection house plants—Mrs. U. S. Alexander.
- Zinnia—Miss Violet Taylor.
- Star of Bethlehem—Mrs. Hargreaves.
- Mallow—Mrs. L. Ollheimer.
- Rose—Mrs. Cain.
- Poppy—Mrs. L. Ollheimer.
- Bachelor button—Mrs. Ulrich.
- Baby's breath—Mrs. W. McEne.
- Wild flowers—Jenny Brown.
- Special awards were granted to Mrs. B. McDonald for an unusual collection of plants and to Al. Miller for a bouquet.
- Judges, Mrs. Todd, constituency secretary, Mrs. Ann Ferguson and Mrs. James Jahn.

## Moisture Begets Moisture

While not a new principle to scientists, the general public in the prairie provinces—the business men in the city and the farmer in the country—are beginning to awaken to a realization that moisture begets moisture and there is also a dawning popular conception of the truism that plant welfare is dependent upon moisture in the atmosphere as well as moisture in the soil.

In other words it is seeping into the public consciousness that crops, whether cereal, vegetable or any other type cannot flourish and yield fruits without drawing sustenance from the air as well as from the soil, a horticultural and agricultural axiom that is often either forgotten or overlooked.

Let the moisture in the atmosphere disappear almost to the vanishing point as it has done in a number of years recently and profitable yields of grains, forage crops and vegetables disappear with it.

And since moisture begets moisture, there can be no moisture in the atmosphere without reservoirs of water to serve as a source of supply. That is at least one, perhaps the principal reason why seasons of drought tend to deepen in intensity as the years go by, and that is why residents of the prairie provinces have reasons to be apprehensive of the future, unless measures are taken to prevent a recurrent drought cycle.

The condition is aptly diagnosed by H. H. Cleugh of Vancouver in a recent contribution to the daily press, describing the situation in Saskatchewan this year, a situation equally applicable to the state provinces in bygone years and likely to be repeated in the future, when he says:

"In Cuba or Jamaica the heat is intense, yet nothing shrivels or turns brown. Why? Because the air is filled with humidity rising off a warm sea. Heat is life, providing the proper amount of humidity is present. Ninety degrees in Saskatchewan is not at all disastrous if the air is humid, but when the humidity is nil, disaster and plant death is the consequence."

And what is the remedy for this condition of aridity—the natural and scientific corollary to the problem? Is it not the provision of bodies of water of sufficient dimensions and in sufficient numbers strategically located to ensure evaporation of life-giving water into the atmosphere to provide the air-borne moisture essential to the plant life in which the people of the west depend for sustenance, and to aid precipitation?

This also is answered by Mr. Cleugh in graphic language in his statement that "evaporation is the most efficient way in which humidity is formed, and most quickly from shallow lakes and ponds. The shallow slough (rapidly warmed by hot summer sun) is what makes moisture."

There could be no more potent argument than this in support of a request for governmental aid to provide irrigation projects, which would contemplate the damming up of hitherto waste waters to form reservoirs of extensive area and preferably of shallow depth. Such reservoirs would serve the double purpose of furnishing water direct to growing crops through the medium of irrigation channels and of supplying moisture to the atmosphere by evaporation from the surface of these bodies.

"Cover your prairie with water as it was in 1882 to 1885," says Mr. Cleugh. "Dam all the streams, ponds, sloughs and lakes; fill them with water, get it how you will but get it; you must have it. A pipe line will do that for you and irrigate 60,000 acres a week and create humidity for 60,000 more."

The loss to the people of the prairie provinces occasioned by lack of moisture in the past few years has been terrific. The total bill for the value of crops which might have matured had moisture been available, plus the expenditure for direct irrigation necessitated because of its lack, runs into hundreds of millions of dollars.

But these two items do not cover the entire cost of drought. Consideration must also be given to the loss occasioned by dust storms, the resultant phenomenon of the drought era and of wasteful cultivation methods. One authority recently estimated that when one inch of top soil is blown away, a section of land sustains a loss of \$192,000 in nitrogen and phosphorus. Thus, the loss of the prairie provinces is incalculable and there may be a plentiful supply of moisture both in the soil and in the atmosphere.

When such losses are weighed in the balance against the cost of construction of irrigation projects, whether they be on a small or great magnitude or a multiplicity of small ones, the policy of withholding expenditure of large sums of money for such purposes is economically indefensible, wherever and to what extent such projects are an engineering feasibility.

### The Selfish Drivers

### Construct Mine-Sweepers

Are Cause of 75 Per Cent. Of All Traffic Accidents

Hon. Ian Mackenzie, Defence Minister, announced that he had been officially informed from Ottawa construction of four mine-sweepers for the Royal Canadian Navy had been approved by the Government. Mr. Mackenzie said the vessels would cost \$352,000 each. Two of the ships will be built in British Columbia—one by Burrard Drydock Company, Limited, in North Vancouver and the other by Yarrows Limited, at Victoria. The other two will be constructed in Eastern Canada, one at Collingwood, Ont., and the other at Quebec City.

### A Good Test

A writer in the Windsor Daily Star says "few adult Canadians can repeat off-hand more than the first couplet of the hymn 'God Save the King.'" By the first verse would stump a goodly number. To prove it ask a few of your acquaintances to repeat the last line of the hymn and note whether they give it "our king" or "the king."

Have, at the south of the Seine, is a central channel port of many shipping lines that serve all parts of the world.

In Scotland's border counties, bridal couples still observe an old custom of drinking hot ale after the ceremony. 2216

### British Sloop At Churchill

History Made When Vessel Arrives 153 Years After Fort Surrendered To French Admiral

On August day, 1782, a French fleet under the famous Admiral Personne appeared before Fort Churchill, built on the shore of Hudson Bay to defend the mouth of the Churchill river, and the grim fortress surrendered without a shot being fired.

On a recent Monday, 153 years later, the next warship appeared before the old fortress. It was His Majesty's sloop Scarborough. She steamed slowly under its ancient guns and landed in the modern harbor of Churchill within the shadow of the towering white elevator.

The ships in the harbor dipped their flags as the sloop went by. The Louis Dreyfus, freighter loaded with wheat, dipped its French tricolor. The U.S.S. Nasop, representing for its long cruise into the northern Arctic, and the Hudson's Bay Company's other boats joined in the welcome.

Port Prince of Wales took 30 years to build. Some of its walls were 42 feet thick and it is 300 feet square. It was intended as a great stone fortress to protect the interests of the Hudson's Bay Company trading into Hudson Bay.

The French fleet surprised it in 1782 with scarcely any defenders in the fort and after its surrender the victors rolled the guns from their placements. They sought to tear down the walls but the work was too heavy for them and they left them standing and sailed away. The great muzzle-loaders lay rusting in the park for 150 years. Its corner historic stone board took the fort over and replaced many of the cannon. The work was completed this summer.

The Scarborough was bathed in sunshine as she came out of Hudson Bay into the harbor. Its commander, Captain Baxter, was greeted by Port Commander W. R. Meadows and later the captains of the other ships paid courtesy visits. The sloop remained at Churchill about a week.

### Empire Drama Festival

Advocated By Earl of Beesborough To Promote Good Feeling

An empire drama festival to promote closer relations between the British Empire, as advocated by the Earl of Beesborough, who as governor-general of Canada from 1901 to 1905, was a prominent part in fostering the Little Theatre movement in the Dominion.

It is generally agreed there is no better way in these days of promoting good feeling amongst peoples, than by encouraging closer relations," he said. "Just as the drama has proved a vital element in the integration of the nine provinces of the Empire, so it could be similarly to help to draw the units of the Empire closer together."

Lord Beesborough pays high tribute to Canada's naturally for the achievement of bringing the stage back to life, despite discouraging obstacles.

If enthusiasts for the drama in Canada could travel 3,000 miles to take part in a festival at Ottawa, it would be a great success. The empire drama festival in London or elsewhere, in which companies from the Dominion and other units of the empire would take part, he said.

Geoffrey Whitworth, director of the British Drama League, which co-ordinates the activities of more than 2,500 amateur societies, has discussed the idea with the Earl of Beesborough and given his assurance of co-operation.

"What we have in mind is a festival to which Canada, Australia, New Zealand and South Africa would each send a company to meet the selected company, representing Britain," Whitworth said.

### To Make Armaments

South Africa Plans To Be Independent At Possible Post War Supplies

A scheme to make South Africa as independent as possible for armament supplies in time of war is under investigation by the Government. At the moment it is confined to experimental work in the manufacture of bombs for the army. Hand-grenades, steel helmets and gas masks are made by private manufacturers. Work is being hurried on with the completion of the Government's small arms factory at Pretoria.

A white leghorn hen at Ladyship, South Africa, has laid an egg 3½ inches long, 2½ inches wide, and weighed five ounces, nearly three times that of an ordinary egg.

West Africa is the home of the world's smallest antelope. It stands only a little more than 12 inches high at the shoulders.

### Sudden Death For Transients

Frequent Accidents Are Tragic Signs Of Social Conditions

On a recent morning, before the dawn, eight cars of an eastbound freight train hurtled off the track in the remote part of the rail route, brought northern Ontario and carried seven transients to sudden death in the crush of sleep cup cars and freight. Another man was injured. Six others were injured. Thirteen transients escaped unhurt and helped the train crew to recue work.

This story is a tragic sign of the times. It is by no means unusual, except in the number of victims involved. Recently accidents have taken the lives of several other transients. The frequency of such reports is evidence of the number of men, footloose and derelict, travelling through the country by freight trains.

In Regina recently a young man was killed attempting to clamber onto an outgoing freight train. His fate was ghastly. The news from time to time multiplies such incidents.

The accident that brought death to eight men in northern Ontario revealed that 25 transients at least were on the train from England. There is no doubt that the attraction to travelling eastward for some of them was the news of beautiful parks in Ontario and a chance for harvest labor. For eight of them the search for happier prospects of existence came to a sudden ending in the dusk of early morning. Pitiful.

There is a tragedy that must convey urgency to official efforts to bring about social maladjustments which create the problem of wandering, jobless men. At the same time there is a tragedy that should stir human emotions and arouse a genuine concern over the human waste of such incidents—Regina Leader-Post.

### Genius For Making Money

T. O. M. Spowith Once Ran Air Taxi Out Of Chicago's Lake Park

T. O. M. Spowith was a salesman of airplane passenger hops on Chicago's lake front long before he became the nation's most famous man who proposed to lift the America's cup with the yacht Endeavour III. It was in August, 1911, in Grant park, in Chicago, that a school boy named T. O. M. Spowith, then 12, met Chicago at \$100 a ride and completed the first international air race. Spowith had ever seen a Spowith. It was then 23 years old, a wavy-haired Britisher in tweeds, piloting a Heriot and a machine that was the first and astonishing speed of fifty miles an hour.

At 23 Spowith gave a hint of the money-making genius that since has put him in the multimillionaire class. In something like two weeks he had met ran from the T. O. M. Spowith collected \$13,120 in prize money with the aid of a slimy kiosk flying machine he had brought from abroad. Prize money, plus the money picked up hopping doreville and solvent passengers to the bank account of the young Briton.

Fame also came to Spowith. His feats were such that four world records were surpassed. In the records, the fastest speed made in the meet, brought him wide acclaim and invitations to the homes of the city's leaders. After all, even the socially elite would meet a man who had flown 57,786 miles an hour.

### British Bacon Shortage

Want Increase In The Quotas Of Imported Supplies

A shortage of bacon in the London provision exchange is causing concern. Discussing the situation, the Manchester Guardian declares prices have been marked up as a means to check the demand.

"The market is quite bare of supplies and importers have sold supplies which are not due until future dates," the paper said.

The attention of the board of trade was drawn to the position and a conference was held between the officials and representatives of the trade with a view to arranging for an increase in the quotas of imported supplies.

### Neglected Fields

Long before America came into the pages of history King Solomon knew that neglected fields led to the evil of Nature as well as the field of man. "I went by the field of the slothful, and by the vineyard of the man void of understanding; and, lo, it was all grown over with thorns, and nettles covered the face thereof, and the stone wall thereof was broken down."

The most sensitive thermometers are not as sensitive to slight atmospheric changes as is the skin of the human face.

### Atmospheric Electricity

Called St. Elmo's Fire By Sailors And Known To Seafaring People for Centuries

The investigators into the Hindenburg disaster found that it was due to an electric spark which came in contact with gas discharged from the ship preparatory to mooring. Investigators of the investigation have come to the conclusion that the spark was none other than what is known as "St. Elmo's Fire."

This is a phenomenon which has been known to seafaring people for centuries of years. Mariners have noticed tiny glowing flames which dance at the tips of masts and spars, particularly during thunderous weather. (Thunder was heard in the distance when the Hindenburg was landing at New Jersey). It is, in fact, atmospheric electricity which takes the form of pale blue phosphorescent light. As far back as 1688, in a book called "Hasky's Voyage," the author wrote:

"I do remember that in the great and boisterous storm of the 24th of the weather there came upon the top of our main yard and maine mast a certain little light, much like unto lightning, and little candle, which the Spaniards call the Cuerpo Santo. This light continued about our ship for three hours, flying from mast to mast."

Sailors have called St. Elmo's Fire, "God's burning fingers," and when the sailors regard it as a portentomen for the voyage. St. Elmo is a corruption of St. Erasmus, the patron saint of seamen in the Mediterranean.

St. Thomas Times-Journal.

### The Drowsy Driver

Is Usually One Who Does Not Get Sufficient Sleep

Whenever the driver of an automobile falls asleep at the wheel long enough to cause an accident—and that is not very long—he will be lucky if he ever wakes up. A study of motor accidents in the past few years reveals that one out of 12 kills somebody, and that one-third of the time it is the driver himself. A surprising fact developed by the National Safety Council is that nearly half of the drivers who fell asleep were driving for less than two hours. A third of them, however, had been without sleep for 16 to 20 hours, so that it is evident that lack of sleep is a factor in many accidents. The drowsy driver returning home from a late party is the most common victim of the highway trap, and he usually drops into his slumber within about two o'clock in the morning.—Scientist Digest.

### SELECTED RECIPES

#### SWEET CUCUMBER PICKLE

- 2 qts. ripe cucumbers
- 1 teaspoon baking soda
- 2 tablespoons salt
- 1 tablespoon root ginger
- 1 qt. vinegar
- 2 lb. white sugar
- 3 cups Crown Brand Corn Syrup
- 1 cup whole cloves
- ¼ cup stick cinnamon (tied in bag)

Method: Peel and seed the cucumbers; cut into 1-inch strips. Cover with cold water; add soda; let stand overnight. Drain and cover with cold water in which the alum has been dissolved; boil ten minutes; drain. Cover with cold water; add ginger and boil fifteen minutes; drain. Measure water and discard (there is usually about 1 quart). Measure as much vinegar as you have water and to each quart add 2 lb. white sugar and 3 cups Crown Brand Corn Syrup, the cloves and cinnamon. Pour over cucumbers and boil six hours. Seal in sterile jars. Makes 60 pint.

#### Canned Apple Juice

Product To Be Tested This Fall For Fair Quality

Canned apple juice, a product which has been the subject of experiment at the Okanagan Valley Division Experimental Station at Sumner, is to be tried out commercially by a leading wholesale concern. It is understood that a trial pack of a thousand cases will be canned this fall and offered for sale to test its popularity with the buying public.

#### A Queer Viewpoint

The four best trained companies in the Great Britain have about 350,000 towels taken each year, while soap, electric bulbs and other things are constantly stolen. An astonishing number of people still exist who seem to think that other people's property belongs to them.

A sponge will absorb more ice water than it will not water.

Polar bears have an exceptionally acute sense of smell.

### BABY KNOWS the Difference

Washed By Puclo Indians in Fifth Century

Water of Lake Mead, slowly piling up behind Boulder Dam, are wiping out an industry which thrives as far back as 500 A.D.

The old St. Thomas salt mine, with its mountain of salt 300 feet high, said by scientists to have been abandoned in the early days of the start of the fifth century, beginning to disappear. Eaten away by the man-made lake, residents of Las Vegas, Nevada, are wondering if the great pile of salt will contaminate the waters to any extent.

Several years ago the ancient salt mine attracted scientists from afar when evidences were discovered that man, in the dawn of history, had engaged in the practice of digging tombs, fashioned from rocks tied together with leather things, were dug up. They proved, said archaeologists, that the mine was the base of one of the principal workings of the Pueblo Indians who inhabited the desert.

At about 500 A.D., until 1200 A.D.

The more modern history of the mine started in our own early western days when the first of the family, emigrating from Switzerland, settled in the St. Thomas section and began the practice of digging tombs, fashioned from rocks tied together with leather things, were dug up. They proved, said archaeologists, that the mine was the base of one of the principal workings of the Pueblo Indians who inhabited the desert.

At about 500 A.D., until 1200 A.D.

The more modern history of the mine started in our own early western days when the first of the family, emigrating from Switzerland, settled in the St. Thomas section and began the practice of digging tombs, fashioned from rocks tied together with leather things, were dug up. They proved, said archaeologists, that the mine was the base of one of the principal workings of the Pueblo Indians who inhabited the desert.

At about 500 A.D., until 1200 A.D.

How many automobile owners would you say have at some time or another lost time and money, while on an auto trip to another province in Canada? You no doubt have been stopped, held up for a considerable time, answering many questions about where you were from, where you were going, and how long you were going to stay were you going to visit, or had you found employment. If it happened to be the latter, you had to purchase a new car license plus drivers license.

The present system seems unreasonable, and hits a big percent of those who really cannot afford buying a new license. Among the victims are a great number who have spent considerable time looking for work and find their funds almost exhausted, and in many cases have to store the car until such time as money can be raised for a new license. In the meantime the gas and oil dealer, tire and repair man lose business while the car is in storage.

Every car license sold in Canada, should be good in any province of the Dominion for the full twelve months of the year. It often happens that the owner of a certain license has secured temporary or permanent work in a sister province, and, as a Canadian citizen, he should have the privilege of operating his car in that particular province until the twelve months have elapsed.

As Canadians surely we have a few privileges left, or must we continue to be the goat and pay license fees, gas and oil taxes, without getting any consideration, when circumstances compel you to seek work in another province.

## The Following Telegram Was Dispatched From Champion On Monday

Rt. Hon. W. L. McKenzie King,  
Prime Minister of Canada,  
Ottawa, Ontario

Many farmers of this district and business men in town are unanimous in opposition to the attack on law, British freedom and fairplay made under guise of the new Alberta legislation. Denial of access to the Courts of Justice to the Citizen gives cause for particular alarm. Outlawry of individual occupations may be carried further and dangerous despotism established against the will of the people.

## Carmangay News

Con. Miller of Pincher Creek was a visitor in town this week.

F. J. Rowley of Bermuda, has purchased a new Ford V-8.

We regret to learn of the illness of Mrs. M. McLaren, Carmangay west.

W. H. Miller of Edinburg, Indiana, paid a short visit at the Jim Bowman home last week.

Mr. and Mrs. John Nelson are enjoying a short holiday at Banff, they left Thursday, August 12th.

Mrs. George Enterline arrived here from Kelowna, B. C. on Saturday to visit friends in the district.

Mrs. Wm. Dayman returned home this week from a month's vacation spent visiting relatives in Saskatchewan and other points.

The North Priscilla Club met at the home of Mrs. Johnny Hauser Wednesday afternoon. A good crowd attended, and a merry time was spent.

M. F. Frank Simpson arrived home Thursday last from Entail, B. C. where she has been staying with relatives for some months.

Miss Freda Boulter, who has been intermediate teacher at the Carmangay school for four years, has been appointed teacher at the Deadman school, Miss Boulter will be missed in town.

We are glad to report that Miss Mary Parker, nurse in training at the General hospital, who was one of the occupants in a car accident at Vancouver, is recovering, having received minor injuries.

J. F. Snyder was pleasantly surprised last week when his two brothers, Albert Lacey and Benjamin Snyder arrived from Oskaloosa, Iowa. They only remained a few days, leaving Tuesday for Creston, B. C. where they will visit Chester Messinger, also his son Lester. B. D. Hammon accompanied them.

On Saturday evening the monthly meeting of the Women's Hospital Auxiliary met in the town office, a good attendance being present. The president, Mrs. Bill Moore and the chair, Mrs. Walter Neilson, secretary, read the minutes of the last meeting which were confirmed not much business to report, it was decided to send for a baby scale. Mesdames Freeman and Folk were appointed visiting ladies for the ensuing month.

MISS HAZEL  
McALISTER, BRIDE-  
ELECT, HONORED

The home of Mrs. D. H. Kusel was the scene of a very pretty shower when some twenty-five friends met in honor of the bride-to-be, Miss Hazel McAlister of Claresholm. The afternoon was enjoyably spent working two very suitable competitions which were won by Mrs. L. McInnis and Miss Edna Hillard. To music played by Misses Mary and Vera Downing the guests, led by the bride-to-be followed by her mother, marched to where the most tasty buffet lunch had been placed—waiting. The climax of the afternoon was when the bride-elect was presented with many beautiful and useful gifts, each accompanied by a choice recipe. After a suitable speech by the guest of honor to the many friends of school teaching days in Carmangay, the guests sang "For She's A Jolly Good Fellow" to end a most pleasant Friday 13th.

## Carmangay News

NORTH PRISCILLA CLUB  
VISITS WATERTON LAKES

By Mrs. Roy Burns

Suddenly when everything was quiet there was a sharp boom, from far out on the lake, loud and reverberating. The 4th of July and they are starting their fire works. Hettie Teskey and I got up at seven, but could not see a thing as the trees were so dense, but we could hear the boom, boom for the days.

Next morning, Monday, July 13th everything was up bright and early. Obedt smelt the bacon and eggs. Time to get out, and enjoy that breakfast the men have cooked for us. Mrs. Sandy Fraser and Mrs. Roy Burns are the cooks for the day.

We all spent the morning quietly. Some were outside playing cards, and some were sitting in the doorway enjoying the cool breeze as it brushed past, leaving the scent of the pines and the wild flowers.

Thurs. found fourteen all set down and enjoyed a pleasant meal. After dinner our group went for a drive to the fish hatcheries. The drive was grand and the scenery along the way was lovely. I cannot begin to describe it. Up and down hills, and through the valleys. Clumps of trees, and valleys green and rich looking like light velvet carpets. Through the trees patches of emerald and purple showed, and the hills rippled and glistened like a gem. The mountains rose up in the background, hazy and blue, crowned and creased with snow, gleaming in the sunshine. The green grass was sprinkled with white, yellow and purple wild flowers.

We drove on until coming to the stone hatchery. The front of the building was surrounded by a soft green lawn and the stone walk up to the house was bordered with flowers. Purple lilies and California poppies creasing back and forth in the breeze.

In this building the fish are propagated. There were 165,000 fish being propagated in this building. At this hatchery they only propagate two kinds of fish. The rainbow trout are speckled on top, with red streaks down one side. The mountain trout are speckled on top, but have red streaks down the gills.

In the hatchery there are a number of screens which are placed in running water where the fish go through the different stages of propagation. In the natural state 5% of the fish that are hatched die. In this hatchery they only lose approximately 1% of the fish. They squeeze the eggs out of the female and take the fluid from the male fish and put over the eggs, and one drop of water gets in. In the eggs the fluid. That is why in the natural state, so many fish die. But that is how nature keeps its balance, for if every egg that was laid, was to hatch, our lakes and streams would be cluttered with fish. Each female fish lays about 8000 eggs.

CONTINUED NEXT WEEK

K. R. McLean, Sight Specialist  
210 Southern Bldg., Calgary will be at the Drug Store on Tuesday afternoon, August 24th.
